PROFESSIONAL SUMMARY

Backend Developer and GenAI Engineer with experience building scalable RESTful APIs and GenAI applications using Python, FastAPI, Flask, LangChain, OpenAI and Ollama APIs. Skilled in prompt engineering, NLP fundamentals, data preprocessing, and cloud-native deployment with Docker and AWS. Strong foundation in DSA, system design, and responsible AI. Open to internship, co-op, and full-time GenAI/backend engineering opportunities.

EDUCATION

Parul Institute of Technology

Bachelor of Technology, Computer Science Engineering (Artificial Intelligence)

Vadodara, Gujarat

Aug 2023 – Aug 2027 (Expected)

EXPERIENCE

CheeseCakeLabs

Backend Developer Intern

Vadodara, Gujarat

May 2025 – Aug 2025

- Delivered 8+ production RESTful APIs using Python and Flask within Agile/Scrum sprint cycles, integrating third-party services and collaborating cross-functionally to support scalable, cloud-deployable microservice architecture on Linux-based environments.
- Improved application performance by 30% as measured by query response time, by optimizing 15+ PostgreSQL and Redis database queries, applying modern software engineering and version-control (Git) best practices in a collaborative team setting.

PROJECTS

Human-Centred AI Interaction System | Python, TensorFlow, OpenCV, NLP, Transformers, WebSockets, JavaScript

- Engineered a real-time, emotion-aware GenAI platform from proof-of-concept to a working MVP by integrating transformer-based NLP, speech processing, and computer vision into an interactive avatar interface, enabling context-aware human-computer interaction over a WebSocket-based microservice architecture.
- Implemented prompt-engineered response generation and expressive voice synthesis to improve interaction quality, while applying responsible-AI design principles to mitigate bias in emotion-classification outputs.

LLM Observability & Cost-Performance Pipeline | Python, OpenAI API, Ollama, LangChain, PostgreSQL, Streamlit, Docker

- Built an end-to-end LLM observability pipeline using LangChain and the OpenAI/Ollama APIs, instrumenting latency, token usage, and cost-equivalent metrics across inference calls to enable real-time performance-regression detection, containerized and deployed via Docker.
- Designed and prompt-engineered an LLM-as-judge hallucination-scoring system, improving degraded-response detection accuracy on a labelled test set, with results visualized through an interactive Streamlit dashboard.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript

Generative AI & NLP: GenAI, OpenAI API, Ollama, LangChain, LangGraph, LLMs, RAG, Prompt Engineering, Tokenization, Embeddings, Transformers, AI Ethics & Bias Mitigation

Backend & Cloud: FastAPI, Flask, Django, REST APIs, WebSockets, Microservices, Cloud-Native Architecture, DevOps Fundamentals, Docker, AWS, Agile/Scrum

Data & ML: Scikit-Learn, TensorFlow, PyTorch, Pandas, NumPy, Data Preprocessing, Feature Engineering, ETL Pipelines, Streamlit, Matplotlib, CI/CD, MLOps

Databases & Core CS: PostgreSQL, MySQL, MongoDB, Redis, Data Structures & Algorithms, OOPs, Operating Systems, DBMS, Computer Networks, System Design

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

National Level Finalist, Smart India Hackathon (SIH 2024) — Backend Developer, presenting a GenAI-driven solution architecture to a panel of industry judges and stakeholders; **1st Runner-Up, Footprints Hackathon**, MSU Vadodara. Solved **900+** problems across LeetCode, CodeChef, and Codeforces, covering advanced algorithms and data structures.

CERTIFICATIONS

AI Fundamentals with IBM SkillsBuild: Cisco

AWS Academy Graduate – Cloud Foundations: Amazon Web Services

Complete Generative AI with LangChain and HuggingFace: Udemy

Complete Data Science, Machine Learning, DL and NLP Bootcamp: Udemy

Data Structures and Algorithms with Java: Apna College

Python Programming Certification: IIT Madras Pravartak – GUVI
