Professional Summary

Results-driven Computer Science student with a strong foundation in Data Structures & Algorithms (DSA) and Python programming. Passionate about scalable software development, algorithmic problem-solving, and system optimization. Adept at writing clean, efficient, and high-performance code for real-world applications. Strong analytical thinker with a growth mindset, eager to contribute to high-impact engineering teams at FANG-level companies.

Technical Skills

- ✓ Programming Languages: Python, Java (Data Structures & Algorithms)
- ✓ Core CS Concepts: Object-Oriented Programming (OOP), Operating Systems, Database Management, System Design
- ✓ Algorithmic Problem-Solving: Competitive programming (LeetCode)
- ✓ Software Development: API Development, Version Control (Git, GitHub)
- ✓ Soft Skills: Analytical Thinking, Collaboration, Communication, Time Management

Education

 Bachelor of Technology (B.Tech) – Computer Science & Engineering

(Expected Graduation: 2027)

Certifications & Achievements

- ✓ Certified Python Developer – [APNA COLLEGE]
- ✓ Advanced Data Structures & Algorithms Course Completion (Covering Trees, Graphs, DP)
- ✓ Consistently Ranked in Competitive Programming Contests
- ✓ Participated in Hackathons & Coding Challenges [SIH-23, SIH-24, FOOTPRINT-23]
